

## INTRODUCTION

LEONARDO DA VINCI , MICHELANGELO BOTH CONTEMPORARY OF EACH OTHER BELIEVED IN INCARNATION AS QUIET EVIDENT FROM THEIR WORKS LIKE SALVATOR MUNDI. They not only believed in incarnation but also believed in second coming of Jesus. They secretly have been known to hide symbols and meanings from wide view of public in their works so as not to attract attention but at the same time demonstrating their belief. From Jesus mother to Jesus himself , Monalisa has been a subject of speculation for centuries .while some believe the secret is lost forever with the painter, Author and Researcher Tim cook explores other unknown side of Leonardo's traits to decode real MONALISA.Tim cook moves on to further narrate about western and eastern deep theosophical connections.

This incarnation theory and various illustrations by da vinci in his works made Tim cook reach to the conclusion that Leonardo works are not only a masterpiece but holds conclusive evidence of Indian connection. **Tim cook connected all dots to complete the missing pieces** so as to get a clear view of the picture.TIM COOK refers to ancient scriptures to draw out striking similarities between the western and eastern civilization works.Da Vinci had been a scientist and man of faith who had lived in "difficult times" and had hidden his messages so as not to be attacked.

Tim cook also points how error might have crept in otherwise knowledge which kept on passing without being diluted or adulterated ,during understanding of this religious painting of renaissance and carried forward hence by all experts, scholars and thinkers.Even great researchers kept repeating the same mistakes in studying renaissance arts especially that of Leonardo da vinci and Michelangelo,they forgot to take in account humor and Basic knowledge and understanding of hindu system which is quite empirical here to arrive to the conclusion. *Tim cook also points to the common error*

*done almost by every author and theorists currently on earth in studying renaissance period works and arts.*

## ouroboros

Snake eating it's tail symbolizes The system(especially government) which was created for infinite time has somehow now added limit to it's age by eating it's own tail .The snake (system) which was vulnerable when it removes it's skin has now become healthy again .

Various theosophical theorists believe the connection is even more evident in works like creation of adam by Michelangelo. Creation of ADAM answers specific questions as to creation of soul where the god is pointing to his own image which is inside everyone as chitta.he is pointing to location of consciousness which is inside the brain.Darwin's theory fall shortfall of answering questions like creation of soul while comfortable at the same answering about evolution of soul. Hindus have been known to work particularly on the location of chitta in human body from a very long time,ancient scriptures points

to that time billion of years ago .Hindus believe total soul more or less remains equal of all beings.they also belived in REINCARNATION.

Renaissance was a period of prosperity across Europe and it was a period when people from all over the globe met to share knowledge and so author hints at MONALISA , the much controversial figure to be a warrior rather than anything else and moves on to relate him furthe to Indian hindu god Krishna i.e Vishnu.

*"Animals will be seen upon the earth, who will always be fighting among themselves, with the greatest harm and many deaths on either side ... O world, why do you not open and precipitate them into the deep fissures of your chasms and caves, and no more exhibit to heaven so cruel and ruthless a monster?"*

The explanation for the prophecy reveals that it speaks "of the cruelty of man".

Again and again, works by Leonardo seem to anticipate ages he cannot have known anything about. This is true of his drawings of machines such as tanks, flying machines and mechanical diggers. These forward-thinking ideas that absorbed him were all to become real in the 20th century(Salvator mundi posing for 2020). Other drawings that might especially haunt us in the aftermath of recent earthquakes and the tsunami in Japan are his Deluges, a series of spiralling, roiling visions of the devastating power of nature.

Leonardo was sceptical about many beliefs of his time, mocking the idea of ghosts or walking spirits, but another eerie note seems to show that he did believe in bad omens. He describes how, as he began to paint a mural in the Great Council Hall in Florence, the mighty bell above it rang, his

pail of water spilt, it started to rain and "soon it was as black as night". He takes this episode seriously, so perhaps he really did believe in prophets and prodigies of nature.

To understand completely LEONARDO DA VINCI and MICHELANGELO'S INCARNATION THEORY YOU NEED TO UNDERSTAND CONSCIOUSNESS (CHITTA) To understand the nature of things and ascertain facts about chitta one have to be familiar with some concepts and figures common to both ancient roman and eastern civilization.

## DARWIN'S THEORY FAILS TO ANSWER ABOUT CREATION OF SOUL

S

Being curious about everything and curious just for curiosity's sake, not simply because it's useful, is the defining trait of **Leonardo**. It's how he pushed himself and taught himself to be a **genius**.

The **Mona Lisa's** fame is the result of many chance circumstances combined with the painting's inherent appeal. There is no doubt that the **Mona Lisa** is a very good painting. It was highly regarded even as Leonardo worked on it, and his contemporaries copied the then novel three-quarter pose. Leonardo da Vinci's *The Last Supper*, depicting

the final few meal Jesus Christ shared with his apostles, is known the world over, and is believed to be most reproduced religious painting ever. The Renaissance artist was also influenced by great thinkers such as philosophers Aristotle and Plato.

## HUMOR Was the key in ancient paintings

*You don't want to be called that frown faced boring person when in reality you are one of the most wonderful playful person in this world. It just happened because of the misconception that you created by being unhappy with your life that day and not smiling for a moment on the other person's joke in the public. Every living creature on this planet is happy and probably in a joyful state so why wouldn't you?*

*You are serving life. life got your human form to be in even more joyful states than the other creatures after so many incarnations (cycles of birth and death) and so much sufferings and pain only to have a higher developed senses as a human to enjoy all sorts of physical pleasure much more than you had in previous births when you were a banyan tree or a monkey .could you have tasted or enjoyed those many things which you could now being a human-god's finest creation's?*

*NO, you don't have any reason to be unhappy was one of the main themes of renaissance arts which often combined humor to demonstrate facts .*

*Some concepts necessary for understanding vedic religion*

## *6 KARMIC DOSHAS*

The creative forces of materialism often gets into a fight with the spirit or soul of our body and starts identifying with 6 karmic doshas ( faults). These doshas are result of the soul identifying too much with the bodily needs and thus entrapping itself within the karmic laws . These doshas are KAMA (lust), KRODHA (anger) , LOBHA (greed) , MOHA (delusion) , MADA (pride) , MATSARYA (envy).

These are the general doshas found in different proportion in each and every human. These doshas have been much talked about in Hinduism in detail in nearly every ancient scriptures including GEETA and is widely accepted that if conquered brings superhuman or god like qualities in the person. but it isn't much ado about nothing. As simple as it seems to understand and recognize these doshas in other persons, the task gets unreasonably tougher when finding it in one's own self as it requires deeper introspection of one's actions and motives and once discovered the correct form and proportion of these

doshas in oneself it requires much penance and devotion to *maa durga* (Wife of *lord Shankar* in Hinduism seated on a lion) to get completely free from these doshas forever from one's life. The reason for these doshas found within different persons in different proportions is still unknown and it's believed it's somewhere related to our past lives actions. These doshas have been called the originator of the Pandora's box(a mythical box from which all the troubles and sufferings in this world originated) for mankind in the present as well as in the next lives.

## UNDERSTANDING ONE'S TRUE SELF

To understand one's true self one needs to remove the veils of the doshas clouding the soul whose true nature is to get dissolved into the cosmic consciousness. The fight with oneself will be painful and tough but will be worth it. If you are determined and have lord's grace on you, you will be invincible at the end however hard these doshas seem to get rid of.

**Kaama (lust)- It is the toughest of all doshas to get rid of once under its spell because of directly descending on us from our animal ancestors. All the major religions of India including Hinduism , Sikh and Buddhism completely disallows any form of lust in thoughts or in action because of its direct association with the animal nature of Promiscuity and the chaos and disorder associated with it within the body ,mind and soul . When overpowered by lust human mind is at its lowest level of understanding, it is unable to think or control it's senses. It is in the most vulnerable state to negative elements of the universe subjecting the bearer to various kinds of diseases , mood swings and misfortunes. A soul overpowered by the insatiable desires of kaama can never be able to comprehend it's true nature and thus advance spiritually. He can never attain the grace of god in this life time and the next even when totally devoted to his god. Our ancient rishis (sages) and saints have tried to illustrate the power of the kaama by calling only the Shiva Mahadeva (GOD OF GOD'S ) because of his extraordinary ability of defeating kaama by burning god of kaama i.e Kaamdev with his third eye (third eye here is often interpreted as one's inner consciousness\*) so through one's consciousness one can defeat kaama if he is keen and totally determined on doing that.**

Moreover, indulging in lustful activities will lead to the wastage of precious life giving seminal fluids. One drop of these seminal fluids takes 100 drops of bloods to form thus suggesting the preciousness of these divine fluid. Wastage of these fluids are found to bring weakness and all sorts of diseases in one's body. Wasting these bodily fluids makes you weak internally externally as well as spiritually. These desire for gratification and momentarily pleasures often become one's habit making it more difficult in the future to get rid of these evil practices for the soul if not checked.

The difficulty in overpowering Kaama can be accessed by the fact that even Muni Vishwamitra was unable to control his passions on seeing Menka thus it's the all powerful nature of kaama that Hinduism suggests kaama but only with one's own wife and that's the reason why many deserving

*\*inner consciousness in hindu culture is often revered to the sixth sense through which we can see things which cannot be seen by our two eyes.*

**saints and seekers in various matths and ashrams across India don't often take vows of brahmacharya (vow of celibacy) because of the difficulty associated with dealing with kaama and thus they marry and also have a family to look after along with their continued search for god which is in no way less than the saints who took life time brahmacharya vows.**

## **KRODHA (Anger)**

**“Have you seen your face when you are angry??” was the question my mother used to taunt me with whenever I used to get angry during my childhood days and this is the question I am going to ask you all “Have you seen your face when you are angry??”. The red ugly face we get when we are angry is the least of our problems but the pain and helplessness associated with the soul is the real problem. The sudden spike in the blood pressure due to increased heart beat often damages the delicate nerves and capillaries of our body which is generally not felt by the person who is himself too inclined in injuring other physically or verbally without caring about the damages taking place within his own body when angry. There is no dosha encountered by the body, when the mind is in such a dreadful state. The mind totally loses the power of questioning and ascertaining the consequences of its actions when angry. No wise person would like to advise or make you calm when you are angry because he knows your anger might even take toll on him even if you didn't want to.**

**The person during anger state is the most helpless of all because he is not able to help himself even. He isn't control of himself. It's often seen most of the regretful incidents take place when we are angry thus the best way to get over with is introspection over your daily activities and especially how you reacted when you were angry and if you have a raised consciousness you will realize how terrible and pathetic you were and not let anger overpower you next time however ugly the situation is it has no power to affect you if you choose not to react to it.**

**Nature has a very unique way of creating situations to check our reactions. It laughs on us the same way we laugh when we see someone behaving foolishly and how dearly we would like him to see him behaving foolishly next time again....we all have a part of this universal consciousness thus if we keep on reacting foolishly like a bull which when rejected by the cow gets angry and starts trampling or goring all other creatures it comes across without understanding that the other creature had no fault in his rejection but only we understand that the reason for its stupid behavior was its anger and his getting angry doesn't in any way improve his chances of not being rejected the second time similarly we too are judged for our choices we take when things doesn't work the way we wanted to by the forces of nature including our own subconscious and since we are the reflection of the divine we are judged even more harshly and made to face even more complicated situations to get stupid reactions**

out of us by mother nature if we had reacted foolishly previous time. Hari's eyes have been depicted wide open in various paintings in asia similar to the wide eyes of MONALISA.

### LOBHA(Greed)

Have you ever faced a situation when you were so close to getting that thing you so dearly *wanted* but alas something unusual , something unpredictable came in between you and your object of desire and at the end you didn't get that. It didn't seem fair at first , it seemed as if the whole universe was conspiring against you However when you desperately *needed* something, nothing of such sort happened and you got it smoothly without too much of praying or too much of labor as if you were the lord's favorite child.....have you ever wondered why??

In the first case you just wanted it without caring about the consequences or even if you deserved it but in the second case you needed it and you would have been devastated if you hadn't got it so while the Mother Nature seems to be harsh at times when you are greedy at times she is very tender and caring when you really need her.

There would have been many similar instances faced by some of you when you had a dinner invitation from three different places and while you were planning to visit and taste all of the three dinner meals you somehow end up sleeping hungry that night. was something wrong with you , were you were greedy that night? These type of embarrassing situations faced should be introspected to reveal the true nature of yourself as nothing happens without a reason and not going to the roots of it will only bring more of such situations in front of you.

The most difficult problem in dealing with greed is you don't recognize you are greedy for a certain thing. When it comes to recognizing greed in others it's very easy task but it gets way too difficult when we have to look within us .You somehow believe that you deserve that thing but our subconscious knows everything about ourselves, things which even we don't so we need to train ourselves to not get too happy for anything because that means you are greedy there should always be a feeling instilled that you deserved it and the fear and pain of losing that thing should be more than the pride and happiness of getting that object of desire to outwit your subconscious so that together with the forces of nature it doesn't conspire to get between you and your object of desire. It's very important!!

Does that mean everything I want for myself is a kind of greed?? No, not really if you deserve that thing and have had worked for it and having it won't change your attitude in any way, you can have

## MOHA (DELUSION)

*"In the beginning was the Word, and the Word was with God, and the Word was God"*

- [John 1:1](#)

**What is that you fear to lose? What is that prevents you from taking risks? What is it that prevents you from exploring your limitless qualities? Is it your fat and flesh laden body or your weak confined thoughts?**

**According to science, some 13 billion years the observable and non-observable portions of our present universe just got created out of singularity \*. Was it a sound with certain frequency which just brought something out of nothing or was it just one another paradox out of the innumerable mysteries of our cosmos that created infinite number of objects out of emptiness. India introduced westerners both to the concept of infinity and zero. our seers and mathematicians shared the belief that both infiniteness and nothingness are the two faces of the same coin that are totally in contrast to each other but compliment each other during complex mathematical problems. Just like Each sides of a coin can be observed and conceived independently but cannot be observed on both sides at the same time by a viewer same is the thing with our consciousness, either you can relate to all sorts of materialistic desires and pleasures of this materialistic body or you can identify with the all-pervading spirit without any space or form who has no other desire than to unify with the eternal divine consciousness i.e the source of it's creation.**

**Whether you choose to be fooled by the ego of the spirit believing the world to exist only within your five physical senses of the human physical body and identify with it or you would rather like to be called a fool among the general public instead for totally abandoning all pleasures of life in your search for god the decision should be entirely yours. our true purpose of life should be to meet the heavenly father who created us with his consciousness and understand that we are not anything more than the mere thoughts of our subconscious mind which has it's origin at the center of our universe.**

**\* A high energy density state of the universe where all known laws of physics including general relativity and quantum mechanics is believed to fail**

**Salvator mundi (saviour of world)- Other than just symbolising 20 twice(2020),Artificial intelligence and two perspectives for things for common public this painting other hidden meaning from general public is that it's name mundi in hindi means head .it refers to the alligator type head(skull) of the lord sometimes referring to the alien consiracy theories prevalent at the time,aliens(extraterrestials) have been known to have alligator type heads.**

MADA (PRIDE)- one of the toughest doshas to handle during our spiritual advancement is mada i.e sense of pride associated with gaining of true knowledge. Most of the truth seekers fail on their journey of spiritual advancement because of this ever powerful dosha which comes into them once they are able to comprehend the workings of the universe and all the forces associated. With every new learning the soul identified with this materialistic world along with other human beings instills a sense of superiority in itself and this sense of superiority prevents him from being humble which is the prime quality needed in any truth seeker by any guru for realizing god. The most intelligent and powerful Ravana had failed to win against Shri Rama because of the same dosha i.e which kept him looped in resulting in a series of monstrous acts by Him which ultimately led to his death.

Even Ravana being a brahman by birth and having the knowledge of all the four Vedas couldn't get rid himself of this dosha i.e because of the difficulty in identifying this dosha within oneself. To correctly identify the true nature and proportion of these doshas one needs to seriously introspect his or hers daily activities as well as the motives behind those activities until he is able to find those actions taken in a sense of pride and then get rid of it by remembering the humbleness of few great souls like Jesus Christ , Shri Ram Krishna Paramhansa, etc.

MATSARYA (Envy)-

Each and every negative thought for others wastes more of the precious life energy earned from meditation and yoga exercises because of the peculiar reactions of our body organs like heart , liver , brains to bad thoughts. These same organs due to certain hormone secretions in our body take very little energy when the mind is happy and filled with good and positive thoughts for oneself as well as others. These continuous inner good thoughts instills a sense of socializing & brotherhood and these good thoughts can be seen on the face of the practitioner and thus creating ways in the universe for a mutual friendship and love between human.

Thus not only envy thoughts but envious companions should also be avoided. Envious companions when shared a good thought with their negative thoughts neutralize the whole environment during the moments of discussions and the chances of the good thought in manifesting itself in reality more often collapses just as the harsh wind blows off a just lightened up earthen lamp.

**Socrates hand pointing upwards**

**SAINT JOHN HANDS IN SIMILAR FASHION POINTING UPWARDS**

People waste lots of time and energy in poor thoughts . Your thoughts manifests into dream or reality depending upon the concentration of your thought or is invariably lost. over thinking isn't a guaranty that your thought or dream to come true so its necessary to save your life force for proper thoughts to destroy all your possibility through which defeat can enter more over positive thoughts is experimentally seen to be much more stronger then the negative thoughts .One needs to be careful that is brain isn't flooded with negative thoughts which makes the soul and will power weak therefore it is important to first understand the nature of your thought and slowly to convert the negative thought into positive one this can be done when you stop thinking the moment a negative thought tries to inters your mind with time and practice there won't be a place for single negative thoughts. one must be careful while outwitting the mind because it tries to play tricks whenever it is devoid of its birthright of thinking any thoughts so one needs to make sure that it does not rebels sometimes good and funny moment can also be thought along with positive thoughts your thoughts often appear in your eyes or your face which can be easily notice by psychologist , yogis and conscious intuitive human beings not only affect your mood and life but also the other people in and around you because poor thoughts are accompanied with negative energy which can be easily grasped by people in an around you thus affecting their wellbeing too. Here thinking should not be confused with day dreaming which just driving temporary pleasure in elusion .

You should try to drive pleasure or happiness from your positive thoughts

#### ONE GOOD THING ABOUT BAD HABITS

Human are creature of habits, it's their habit that makes them unique from each other. Different people react differently to different situations because of their unique habits. Habits are responsible for various physical traits to mental state of a human being so it's very important to carefully notice one's habits. The only good thing about bad habits is that even it is a habit and believe it or not habit has a power to change your life and once you develop it consciously or unconsciously you will be doing that wastage of life force or prana.

However, for bad habits The "I" who wants to overcome the habit, and the "I" which enjoys the habit are different. Learn to recognize the difference. The habit is enjoyed by your body-mind, it is justified by your intellect, it is disgusted by your Samskara, It is witnessed by your Chitt (consciousness) and then there is an "I" which is detached from all this. That "I" is your soul,

Learn to differentiate between your various "I"s. Live at the level of soul and let your body-mind do whatever they want to do. At one point your soul will provide strength to your mind and you will be able to overcome your habit.

It is your habit. Only you have to get rid of it.

## SOME Secrets.....

. Wearing a bangle or bracelet or armband made of silver, copper and brass or lead greatly enhances the drawing capacity of cosmic energy by your body the popper working of this phenomena is not understood by scientists around the world presently. However one should be careful to not speak lies when wearing copper as copper is believed to be a very pure metal because of tremendous amount of heat associated with it's creation . Certain metals emit energy because of the unique characteristic of its particle's in different states of vibrations. Every particle possess unique properties because of its vibrations of its different frequency of its individual atoms and contact with human body produces vibrations in our bones of which in details I will not go in this book it affect your mind body mind and soul giving you a stronger mind a healthy body and joyful soul drawing infinite power from the universe with less effort.

Non vegetarian food should be avoided as much as possible or completely discarded form your diet only those food should be eaten which clams your body mind and soul vegetarian food not only taste good but also does not sends hit waves unlike non vegetarian foods in your body non vegetarian food also contain the pain of the animals and is widely believed a layer of fat around your brain this greatly reducing the drawing capacity of cosmic energy by medulla oblongata thus bringing early old days and suffering to the person. Moreover we humans we are meant to eat vegetarian foods like monkeys. Most of the carnivorous animals are seen to drink water with their tongues out and in same case of breathing. non vegetarian food are not meant for human beings though its good for health but produces devastating effect on your soul thus totally not desirable for truth seeker.

Try to meditate near heavy object like mountains and old temples because their massiveness bends times space fabrics thus allowing your consciousness to transcend beyond their dimension easily.

Do not disturb life form during evening with your actions like plucking leaves , flowers etc. during evening or using water from ponds, wells and thus disturbing them during their sleeps after their whole tiresome day during their rests.

Don't think about bad dreams after waking up. They have a chance of getting fulfilled the more you think about them. If a bad desire has been dumped in SwapanLoka, you have renewed it the very next morning by thinking about that dream. So the desire still remains.

## ILLUSION

The strings of Time and Fluid of space cannot be comprehended with mind. Because mind is within the illusion of Time-Space. You need to transcend mind. You will realize that you are not a fixed body-mind. You can move. You are a free soul which can ride anything. Don't imagine the soul with mind. Transcend your mind and realize the soul. Then all your questions shall be answered.

You will realize that there are only 3 things out there - (1) Soul (2) Time strings (3) Space fluid. Soul is the rider and the vehicles of soul are made up of space-time. There are infinite combinations of Time-Space and therefore there are infinite vehicles available for soul. The soul chooses a vehicle as per it's Karma-desire and experiences the ride.

Don't seek ready made answers. You need to find your own answers. Lord Hanuman's words are there to guide you. They are not there to sit in your mind. They are there to help you transcend your mind. The illusion of Time-Space is very strong. Therefore you need to have a very strong desire to get answers. Then only you can come out of the illusions.

These western period arts referring to their deep eastern connection these become a valuable source of knowledge and open vaults to a larger secrets chamber. India is the second most populated country in the world. it's religion Hinduism primarily based on the religious worship of his primal god Narayan. Narayan have had various incarnation as human called ram and Krishna.

Every religious or conscious human being knows the power of spreading happiness and love. We have heard the stories of several great souls in the past who are still revered for their benevolence. Almost all the religious scriptures of the world mention the importance of helping the poor and needful. Making someone happy will bring happiness back to you and your family and that too increased manifold and also improves your karmic life and thus benefitting 7 generation of your family .on the same hand selfish and meanness brings unhappiness to you and your immediate relatives and reducing the chances of you attaining salvation in this or next life.

## Renaissance art popularizes KARMA

Exact working of karmic law is very oblivious and complex however it can be ascertained in short that good & selfless actions brings prosperity and happiness in this and the next life. Any action by you linked or retained in your conscious or subconscious memory will produce reactions in your life. There are various incidents that occur in your life to which you don't have any reason for it's occurrence. It's definitely because of some of your past actions in this or past life by you or your relative. Though past life karmas cannot be remembered by normal human beings but deeper introspection and meditation might reveal to you those present life actions which led to such happenings or incidents that you faced. To nullify your karmic bondages react as minimum as possible to arising situations and if acted try to erase that memory from your mind in which some mistakes were perhaps made by you in judgement however willfully done bad actions are sure to bring some misfortunes.

Why is that soul has to carry the karmic bondages in other lifetime ? Karmas are the massive information which is accumulated in our body at cellular as well as astral level because of our interaction with the surrounding. Why couldn't all the karmic effects get nullified with their action and reaction ending in the present life itself? The answer to this question lies in the fact that there are innumerable types of actions good or bad activities that a living thing can do with another lifeform. The exact nature of the actions produces results which cannot be limited to the few senses of the life form in that lifetime thus then it becomes important for the soul to carry forward the results in the next life where at suitable time the result finds full expression . For e.g. a man who collects horns of a particular animal killing it for posterity his entire life. However dearly you would want karma to punish him as quickly as you can you cannot expect him to find another man in his same life time which does the same with him. But then he might be born in other life form in his next life where he might be killed for the same type of purposeless acts which he had been doing his entire life in a human form.

To understand completely LEONARDO DA VINCI AND MICHELANGELO YOU NEED TO UNDERSTAND CONSCIOUSNESS (CHITTA)

THE NOTORIOUS CUNNINGLY SMILING GOD SEEMS TO HAVE DETONATED THE BOMB AND HAS TURNED AROUND AND IS JUST WAITING NOW FOR THE BOMB TO EXPLODE. THE TURN ALSO SYMBOLIZES THE SUPREME LORD WHEN HE WAS A MISCHIEVOUS CHILD AND WOULD WAIT FOR HIS MOTHER TO TURN AROUND FROM HIM TO DO HIS MISCHIEF. IT IS A SORT OF REMINISCENCE OF VARIOUS MOMENTS OF HIS BILLION ACTIVITIES. HERE IN TIM'S PERSPECTIVE LEONARDO HAD A VERY DEEP KNOWLEDGE OF HINDUISM RELIGION. WHERE HARI IS REGARDED AS THE SUPER SOUL, WARRIOR, BLISSFUL, SHY, ALPHA, LAST REFUGE, PRIMAL, DELIVERER AND LADEN WITH VARIOUS OTHER QUALITIES OF THE LORD HIMSELF. The turn also symbolizes the time where the lord has now decided to stand for righteousness and parted ways with his unholy activities.

The lord who is equally capable in disguising as a girl just like his Mohini avatar for attaining his goals also is seen in this painting which is why this girlish component became associated (synonymous) with this painting. The turn is also sacred because of the fact that the timing is so perfect that everything else outside the turn including the space would have collapsed. LEONARDO KNEW THAT WHAT WESTERN CIVILISATION HAD NARROWED DOWN DOWN TO ENERGY, EASTERN CIVILISATION HAD ALREADY NARROWED IT FURTHER DOWN TO COSMIC ENTITIES (GODS). These truths bigger than that of discovery of god's particle or stem must be preserved for posterity.

It may sound strange but the biggest danger to your spiritual advancement is if you accept as your guru a person who is incapable of guiding you back home, back to Godhead.

It is Kali-yuga and this age is called the age of quarrel and the age of hypocrisy. Almost everyone is cheating and almost everyone is presenting themselves as something which they are actually not. This is the age of the cheaters and the cheated. Practically every guru is a cheater and practically every so-called disciple wants to be cheated. Renaissance was a period not just of cultural prosperity but of religious prosperity as well. People wanted answers not only to scientific questions but to spiritual and ontological questions as well.

Most so-called spiritual seekers are not really prepared to surrender to Krishna or to surrender to Krishna's pure devotee and make the mission of Krishna's pure devotee their own mission in life. No they have their own program. And they want a guru who they can give some money to and guru will give them some blessings and assure them that everything they are doing is OK and they really don't have to change much in their lives at all. So they want to be cheated. They want a guru who will reassure them that it is OK to stay in illusion, it is OK to stay in maya, as long as they give the cheating guru some money, everything is fine...

This is the way of guru in Kali-yuga. Practically you can guarantee that any person you meet who is claiming to be a guru and claiming to be able to guide you back home, back to Godhead is cheating. In Kali-yuga it is safe to assume that anyone who is claiming to be a guru is bogus and is unable to actually help you reach the ultimate goal—shelter at Krishna’s lotus feet.

So in a genuine way these devotees take up the position of guru but because they are not themselves pure devotees they can not guide their disciples in such a way that they can give up all their sinful activities and become properly situated as pure devotees in Krishna consciousness. Because these “sincere” gurus are unable to save their disciples and they have taken the responsibility to save them, they suffer so much bad karma. So ultimately they fall down and so do their disciples.

It is something like if someone has very good intentions and sees a drowning man in the ocean and out of real love and concern for the drowning man he jumps into the ocean to save this man—not even considering that he can not swim himself. So it is a very nice sentiment. But he will drown himself and he will not be able to save the drowning man—both of them will drown. So from this very nicely motivated action only disaster is the result.

The would-be lifesaver should have taken the time to consider the situation and instead of trying to save the drowning man himself admitted his inability to swim and found someone who can really swim and save the drowning man. If he can find some qualified lifesaver and connect him to the drowning man then he will save the drowning man and he will not drown himself.

One can reach enlightenment on the strength of his own aspiration. We know that the first person who realised God did not have a human Guru. But again, we know that there is something called speed. If one gets help from a qualified person, then he can make the fastest progress. Why do you attend this university? So many people are studying here. They could have studied at home instead. But they knew that they could not make the fastest progress by themselves, so they came here to study. Books are available for the students to read, but they also need a teacher who will be able to show them how to study the field they have chosen and how to interpret the meaning of what they learn. In this way they learn their lessons faster.

For everything we need a teacher. The mother is the first teacher. She teaches the child the alphabet for a few months. Then he has a kindergarten teacher, primary and high school teachers and college and university professors. Then this human study, earthly study, ends, and he himself becomes a teacher. But the mother played her role for a few months. She taught him the alphabet. If I want to learn how to sing, I need a teacher. If I want to learn how to sprint, I need a teacher. If I want to do anything on earth, I need a teacher to show me the best possible way. Then how is it that I do not want or need a teacher in the spiritual life? Spirituality is also a kind of knowledge. You will say, "God is within us. Why have we to take any help from anybody?" But I will say, "God is in this book also. Why do we ask a teacher to explain the book?" God is in everything, but we know that

there is always someone who is more advanced in a particular subject than we are. A professor of English has more knowledge than a student. In the spiritual life also, a God-realised man, a spiritual Master, has much more God-Knowledge than a seeker. But when a seeker realises God, he is like a student who has received his Master's degree. He no longer needs a teacher.

We have to know how fast we want to go. In the spiritual life we can stumble, we can walk or we can run the fastest. When we have a Master, we can run the fastest because he offers us his own inner strength, his protection, his concern, his compassion and God's Light. He offers, and the disciple receives from him. A guru is not indispensable, but again, one can be wise in this matter. If one can reach the Goal much faster by taking help from someone on the way, what is wrong with that? America is the land of speed. Everything here is faster than the fastest. If you want to realise God as fast as possible, then take the help of someone. After you have reached your Goal, you no longer need to take his help. I came to San Francisco from New York by jet. The jet pilot was my guide. As soon as I landed here, I no longer needed the jet or the pilot; I had reached my destination. In the spiritual life also, when you reach your destination you don't need anyone. But while you are travelling you have to know how fast you want to go. I could have come to San Francisco from New York by some other means, but it would have taken me a longer time. The seeker has to know whether he prefers to travel at the speed of a bullock cart or at the speed of a jet plane. If one wants to realise God on his own, he will proceed at the speed of a bullock cart; but if one wants to realise God with the help of a Master, he will complete his journey at jet speed.

## BEYOND I

### UNDERSTANDING "I"

Renaissance period often made people ask why spirituality at all when they can live in reality and what's the problem in acquiring material success and if Spirituality is only to atone for the wrongdoings which people do out of ambition etcetera. I appreciate their concern but I would like to tell that the only problem in going only after materialistic successes is that you are never contented with it. It's hard to get out of its grip once you have got a taste of it. During their conquest for materialistic pleasure people often act just like those Himalayan deers who searching for the scent that is in their bellies wanders all over in vain; however had its consciousness been risen a bit it would have understood that the scent that's been driving it crazy was nowhere else but in its own belly. Moreover whatever few fleeting moments of happiness you gather with victory during your quest for success driven by greed or ambition or enjoyment whatever it soon vanishes and again you start running again to your next conquest till you get defeated at the end by life itself one day.

Spirituality is not at all to compensate for the wrongdoings you did during your attempts for success but it is to understand the true purpose and meaning of your life. The best way for present generation is to combine materialistic success with spirituality only then can they remain ever truly satisfied , peaceful and blissful.

Every soul has a unique combination of Karma-Desire. As a result, it has a unique reality/world around it. To get out of that reality/world, the soul has to find its own path which leads to Moksha. There are no general paths. There can be similarities in the paths of many souls but every soul's path is unique.

Suppose a million souls found out that there is a similarity in the paths being followed by them. So they gave a general term to refer to all those paths. That general term is 'Hinduism'. In ancient times there were no such labels as 'hinduism'. It has come up only in the modern history.

Don't dwell in labels. Realize your soul and find your unique path which can get you out of this illusionary world and get you Mukti. DA VINCI'S PORTRAYAL OF JOHN AS JESUS IS EVEN MORE INTRIGUING WHERE HIS FIRST INDEX FINGER POINTS TO HARI in the same way Socrates points it towards him accusing him perhaps for the circumstances where he is going to drink the chalice of poison.

The one thing that has been noticed all over the world is people's are more happy if they have no regrets. Most of the kids till their teenage are more happy compared to the adults only because they had been following their hearts for most of their actions. But once people get older they start hesitating even for things they would have once loved to do out of many reasons. Rich and poor people alike regret because of many reasons but the most common found reason is they did not take care of their loved ones when they had the chance to do it. They were so occupied in their own affairs that they didn't speak what they had to do or didn't do what they should to their loved ones when they had the chance and this regret doesn't let them be happy even if they get whatever they had desired for. Renaissance was a period not just of cultural prosperity but of religious prosperity as well. People wanted answers not only to scientific questions but to spiritual and ontological questions as well.

So it's very important to keep in your mind. The greatest treasure you possess is the people you love. Money, fame , power everything is nothing compared to the feeling of being loved. You need to take care of each and every person you love and do whatever possible to keep them happy starting from you family members mom , dad , siblings , grand parents etc. They have been loving you selflessly never giving heed to any out of your many shortcomings it's time to pay back. If you are able to return them back even half of the love they showed and if you get successful in making them happy trust me you have nothing to worry you have consciously or unconsciously improved your karmas. There is no regret to haunt you back once you get wise someday. You will soon be surprised to see you are one of the few happiest people in the world if you have paid them back all those people who had once showed their love to you.

## DESIRES AND DEVOTION

Desires may get blocked for a number of reasons. An ordinary human being thinks that Gods can clear the blockage instantly. That is not true. If you have read Leelas of Lord Hanuman in, you must have realized that Gods also work within the framework of laws which run this universe.

There is a certain trap called the Mire Gridlock. More Gods try to blockage in such a gridlock, more new blockages come up. That is partly caused by the soul itself. You need to cooperate in order for Gods to be able to clear the blockages. Here are a few things you can do from your side:

Your soul has already expressed your desire to the universe. Don't repeat that desire again and again otherwise things get complicated for Indra Deva. If you see your desire getting fulfilled in SwapanLoka, you can repeat your desire again after waking up. Otherwise don't repeat your desire.

Repeating desire doesn't only mean speaking with your mouth or thinking. You are expressing this desire hundreds of times everyday. You know how? Your single desire has affected your entire outlook. It is showing its influence in every single thing you do. To make things simple for Indra Deva, you have to do your Karmas as if you don't have this unfulfilled desire loaded at your back.

Also, don't let your mind be in the fear that 'what if the desire doesn't get fulfilled. What if I don't become mother.' If you have this fear, you have Asurrahs around you and where there are Asurrahs, Gods cannot help you. It is up to the soul to stay aware and not let Asurrahs take over body-mind. It is not Gods' duty to shoo away Asurrahs.

One way to stay free from fear is to think about an alternative. You should think like, 'No problem if my desire doesn't get fulfilled. I can adopt someone'. Or any other alternative you can think of. The **Eye of Providence** (or the **all-seeing eye of God**) is a symbol that depicts an eye, often enclosed in a triangle and surrounded by rays of light or Glory, meant to represent divine providence, whereby the eye of God watches over humanity

## MEANING OF DREAMS

**Renaissance period art depicts dream as happy that the bad thing has happened in \*\*SwapanLoka. Otherwise it could have happened in \*MaanavLoka. Bad dreams DO NOT signify that bad things are going to happen to you in real. But if you think about those bad dreams after waking up, that thinking (and not the dream) can change your Karma in bad way. Take example of a woman who saw evil nature of her mother-in-law (MIL) in her dreams. This dream signifies that that MIL cannot be so evil in MaanavLoka. Suppose that woman inferred a wrong meaning of that dream. She believed that her MIL is evil in real. Then she will stop trusting her**

**MIL and her relationship with her MIL will go wrong. Then her MIL may become evil in reality. That woman may think that she had already seen evil nature of her MIL in dreams and her dream was true. But actually her thoughts after the dream (and not the dream) created mistrust and made her MIL evil. Therefore, do not think about dreams after waking up. If you create a fear in real life because of bad dream, that fear may get materialized. Because fear is a form of desire. What we fear is what we indirectly desire. Therefore, if you see a bad dream, thank God for dumping your bad desire in SwapanLoka. If you see a good dream, renew that desire and work on your Karma so that the good desire can be fulfilled in MaanavLoka next time.**

**\*maanavloka – Abode of humans**

**\*\* Dreamloka- Another realm where soul goes when our during deep sleep. Our physical laws of nature of maanavloka do not apply there exactly however there are similarities.**

There is a 3 dimensional space around you. Your body moves in that space. How do you denote that space geometrically? You draw three axis : x-axis, y-axis, z-axis. You can denote location of an object in the graph of these axes.

The way body moves in space dimensions, your soul moves in the Karma-desire dimensions. Imagine your soul as a point in the graph of x,y,z axis. In every axis there is positive side and negative side.

So when you do something in this world which accumulates negative Karma on you, your soul moves on negative side of Karma-axis. And when you do positive Karma, your soul moves in the positive side of Karma-axis. This way your soul's Karma-Desire coordinates keep changing. It is similar to change of location of your body in space.

If your soul remains at negative side of axis (AsurLoka), then also you are trapped in the illusion. If you are only at positive side (i.e. you are in VishnuLoka), then also you are trapped. Even if you are at zero (In BrahmaLoka), you are trapped. If you keep oscillating between negative and

positive i.e. if you are indifferent to both positives and negatives (in ShivaLoka), then also you are trapped.

Leonardo was both a great mathematician and a spiritual seeker. The truth lies beyond positives and negatives and truth is stranger than fiction was the main theme of renaissance period arts.

## Sage Aurva's experiments

One of the Indian rishis knew that only two things are required to bring a life into existence – (1) Fluid of Space (2) Threads of Time. He applied his vast knowledge of Space-Time to come to the conclusion that a woman can mother as many as 60,000 children. He found that a life comes into existence when time and space intersect with each other. And the souls who occupy a woman's body have access to as many as 60,000 such intersection points. His experiments nowhere mention the number of intersection points the souls who occupy in man's body have access to.

He found that God of Time manifests through woman body and God of space manifests through man's body. Therefore women provide the 'Time' part of intersection and man provide 'Space' part of intersection.

Physical intercourse is one of the methods to rise above body-mind and reach to the level of soul and then drive the souls to an intersection of space-time where life comes into existence. Also, physical intercourse is the method to call Lord Indra in the body of male and Kaal deva in body of female.

Da Vinci began working on The Last Supper in 1495 and finished the masterpiece in 1498.

DESCARTES eventually discovers that “I **exist**” is impossible to doubt and is, therefore, absolutely **certain**.

While modern theories like Charles Darwin's theory of evolution only explain about evolution of soul only after birth this piece of excellent renaissance art give answers to rather more intriguing questions regarding before creation of soul even.

Several themes could be said to unite **da Vinci's** eclectic interests. Most notably, he believed that sight was mankind's most important sense and that “saper vedere” (“knowing how to see”) was crucial to living all aspects of life fully.

While modern writers fail to bring out a theory of everything da vinci was the first to be able to achieve it.
